BIM-APES x JPMorgan Chase x JP Morgan Wealth Management

Deal Closing Requirements & Stand-Alone License Framework

Prepared by Dashawn R. Bledsoe, Sole IP Owner, BIM-APES Software | Queens, NY | April 14, 2026

Section 1: Executive Deal Summary

Element	Detail
Licensor	Dashawn R. Bledsoe, Sole IP Owner, BIM-APES Software
Licensee	JPMorgan Chase & Co. / JP Morgan Wealth Management
IP Strategy	Defensive Publication + Trade Secret (No Patent Required)
Deal Phases	90-Day Free Pilot → 3-Year Initial Term → 2-Year Renewal Option (5 years total)
Governing Law	State of New York
IP Ownership	All IP rights retained by Dashawn R. Bledsoe — no transfer, no patent sale
Target Market	5 Leagues (NBA, NFL, MLB, NHL, MMA/Boxing) — 129 Teams/Orgs — $57.584B Gross Revenue TAM

Product Suite — All 7 Products

#	Product	Pricing Model
1	**Enterprise NIL Intelligence API**	Per-call pricing + base fee
2	**White-Label NIL Advisory Dashboard**	Seat-based + platform license
3	**Compliance-Ready Reporting Package**	Bundle-based + annual subscription
4	**Co-Branded NIL Education Portal**	Annual license fee
5	**Advisor Enablement Tools**	Seat-based monthly
6	**Data-Intelligence Subscriptions**	Tiered (Basic / Pro / Enterprise)
7	**Custom Analytics & Consulting**	Day rate + retainer

Total Addressable Market (TAM) — 5 Leagues

NHL INTEGRATION — UPDATED APRIL 2026

NHL integration expands TAM by 12.0% — updated April 2026. The addition of the NHL as the 5th league increases BIM-APES coverage from 4 leagues / 98 teams to **5 leagues / 129 teams/orgs**, with gross revenue TAM growing from $51.394B to **$57.584B**.

League	Teams/Orgs	Gross Revenue	BIM Service Fee	BIM Net Profit
NBA	*Included in 5-league totals below*			
NFL	*Included in 5-league totals below*			
MLB	*Included in 5-league totals below*			

League	Teams/Orgs	Gross Revenue	BIM Service Fee	BIM Net Profit
NHL (NEW)	31	$6.190B	$123.80M	$61.90M
MMA/Boxing	*Included in 5-league totals below*			
TOTAL (5 Leagues)	**129**	**$57.584B**	**$1.152B**	**$575.84M**

Section 2: Defensive Publication — Why No Patent Is Required

What Is a Defensive Publication?

A defensive publication is a public disclosure of an invention that establishes **prior art under 35 U.S.C. § 102**, preventing anyone — including competitors — from obtaining a patent on the same or similar methodology. It is a strategic IP tool that blocks patent claims without requiring the inventor to file (or pay for) a patent.

Element	Defensive Publication	Traditional Patent
Cost	$200–$500 (IP.com Prior Art Database)	$15,000–$50,000+ (prosecution)
Algorithm Disclosure	Broad methodology only — no specifics	Full public disclosure of method required
Duration of Protection	Indefinite (trade secret layer)	20 years from filing date
Licensing Flexibility	Non-exclusive, multi-institution	Exclusive or non-exclusive

Why BIM-APES Prefers This Model

1. **Indefinite trade secret protection** — patents expire after 20 years; trade secrets do not

2. **Zero algorithm disclosure risk** — patents require full public disclosure of the method; defensive publication does not
3. **Non-exclusive licensing flexibility** — can license to multiple institutions simultaneously without diluting IP rights
4. **Federal enforcement** — via the Defend Trade Secrets Act of 2016 (18 USC §1836)
5. **Legal precedent** — *Masimo Corp. v. True Wearables* (Fed. Cir. 2022) — court upheld trade secret protection for an algorithm even though the broad methodology was published

Dual-Shield Strategy

SHIELD 1: Defensive Publication

Blocks competitor patents at $0 cost by establishing prior art under 35 U.S.C. § 102. Any subsequent patent application covering the same broad methodology will be rejected or invalidated.

SHIELD 2: Trade Secret

Protects specific weights, coefficients, training data, and proprietary algorithms indefinitely under the Defend Trade Secrets Act of 2016 (18 USC §1836). Federal enforcement with both civil and criminal remedies.

Filing Checklist

- ☐ Draft defensive publication describing broad NIL valuation methodology (inputs, general approach, validation framework)
- ☐ File on IP.com Prior Art Database ($200–$500)
- ☐ Retain proof of filing date (timestamp = prior art date)

- ☐ **DO NOT disclose:** specific weights, coefficients, training data, proprietary scoring algorithms

The 30-Second Answer When JPMorgan Asks "Why No Patent?"

> *"We prefer defensive publication with non-exclusive licensing deal types. This gives us indefinite trade secret protection, zero algorithm disclosure risk, and the ability to license to multiple institutions. It's the same model FICO uses — JPMorgan Chase already pays FICO for a black-box score every day. BIM-APES is the same architecture, but for NIL instead of credit."*

Section 3: Trade Secret Considerations for JPMorgan Chase

How FICO Does It — And How JPMorgan Chase Already Lives This Model

Element	FICO	BIM-APES	JPMorgan Chase Today
Algorithm	Trade secret — never disclosed to banks	Trade secret — never disclosed to partners	Consumes FICO scores without algorithm access across all Chase credit products
Output	Three-digit score	NIL Valuation	Chase uses FICO 8

Element	FICO	BIM-APES	JPMorgan Chase Today
	(300–850)	Score, Market NIL, Divergence, Brand Equity	and FICO 10 across consumer and business lending
IP Model	213+ active patents + trade secret (dual protection)	Defensive publication + trade secret (shield-only)	JPMorgan holds proprietary internal models (e.g., JPM Risk Engine)
Licensing	Per-score base fee; shifted to direct licensing model Oct 2025	Per-call API + base fee + seat licensing	Chase pays FICO per-score fees across all credit decisioning
Derivative Controls	No reverse engineering, no derivative works	Identical contractual terms	JPMorgan already operates under these exact FICO restrictions

5 Potential Deal Blockers & Mitigations

#	Blocker	Risk Level	Mitigation
1	**OCC SR 11-7 Model Validation**	MEDIUM	Classify BIM-APES as **ADVISORY/INFORMATIONAL** — not used for credit, lending, or capital adequacy. Same classification as Bloomberg terminals, S&P data, Moody's Analytics research.
2	**JPMorgan Minimum Control Requirements**	MEDIUM	Ensure SOC 2 Type I/II, documented InfoSec program, NIST-aligned controls before vendor

#	Blocker	Risk Level	Mitigation
			onboarding. JPMorgan publishes detailed MCRs — NIST CSF alignment, COBIT framework, documented risk management.
3	**TruSight Assessment**	MEDIUM	Proactively submit to TruSight assessment — demonstrates institutional readiness and speeds onboarding. JPMorgan co-founded TruSight for third-party risk management.
4	**Trade Secret Loss Through Over-Disclosure**	**HIGH** (if mismanaged)	Strict NDA, non-compete, derivative classification, audit rights, plus DTSA federal enforcement. Never share weights, coefficients, or training data.
5	**Competitor Patent Attempts**	BLOCKED	Defensive publication = prior art under 35 U.S.C. § 102. Any competitor patent filing will fail on prior art grounds.

Section 4: 90-Day Free Pilot Structure

Pilot Duration: 90 calendar days from execution date

Pilot Cost to JPMorgan Chase: $0 — full product suite at zero cost during pilot

Pilot Scope — All 7 Products

#	Product	Pilot Deliverables	Success KPIs
1	**Enterprise NIL Intelligence API**	500 free API calls	<200ms response time, 99.5% uptime
2	**White-Label NIL Advisory Dashboard**	5 advisor seats	80%+ weekly active usage
3	**Compliance-Ready Reporting Package**	2 sample compliance bundles	Report accuracy validation by JPM compliance
4	**Co-Branded NIL Education Portal**	Demo environment with 10 athlete profiles	User engagement metrics (session duration, return visits)
5	**Advisor Enablement Tools**	10 advisor seats	70%+ adoption rate among enrolled advisors
6	**Data-Intelligence Subscriptions**	Basic tier access	Data freshness <24 hours
7	**Custom Analytics & Consulting**	5 consulting days included	Deliverable satisfaction rating (target: 4.5+/5.0)

Conversion Timeline

Milestone	Activity
Day 75	Pilot performance review with JPMorgan Wealth Management stakeholders — review all 7 product KPIs against targets
Day 85	Commercial terms presentation — present 4 deal type options (see Section 8) with full pricing schedules
Day 90	Pilot concludes → conversion to paid enterprise term **OR** mutual wind-down with data return/destruction

POST-PILOT PRICING

All products revert to full enterprise pricing upon conversion. No discount is carried forward from the free pilot period. Pilot pricing exists solely to demonstrate value — commercial terms begin fresh at Day 91.

Section 5: Startup Account Options — Chase Business Banking

Why Open a Chase Account

- **Establishes banking relationship** with the counterparty — you become a Chase business customer, not just a vendor
- **Demonstrates institutional alignment** — signals long-term commitment to the JPMorgan Chase ecosystem
- **Positions BIM-APES strategically** — a Chase business customer AND a JPMorgan technology partner simultaneously

Chase Business Checking Accounts — 3 Tiers

Feature	Chase Business Complete Banking®	Chase Performance Business Checking®	Chase Platinum Business Checking℠
Monthly Fee	$15 (waivable)	$40 (waivable)	$95 (waivable)
Waive Fee	$2,000 min daily balance OR $2,000 Chase QuickAccept deposits OR $2,000 Ink card spend	$35,000 combined avg beginning day balance	$100,000 combined avg beginning day balance
Free Cash Deposits	$5,000/cycle	$20,000/cycle	$25,000/cycle
Free Transactions	20 teller/check transactions	250 transactions	500 transactions
Best For	Startup phase	Growth phase	Enterprise phase
New Customer Bonus	Up to $500 with qualifying deposits	—	$3,000 with $500K deposit maintained 180 days

RECOMMENDED START

Chase Business Complete Banking® — $15/month (waive with $2K balance), lowest barrier to entry, upgradeable as revenue scales. Pair with a **Chase Business Savings** account for combined balance toward fee waivers on higher-tier products.

Section 6: Business Credit Cards — Chase Ink Suite

Chase Ink Business Credit Cards — 4 Options + 1 Premium

Card	Annual Fee	Welcome Bonus	Best For	Recommended Sequence
Ink Business Cash®	$0	$750 (spend $6K/3mo)	Cash back in categories (5% office supplies, internet, phone; 2% gas, dining)	**START HERE** — $0 cost
Ink Business Unlimited®	$0	$750 (spend $6K/3mo)	Simple 1.5% unlimited cash back everywhere	ADD SECOND — catch-all spend
Ink Business Preferred®	$95	100,000 points (spend $8K/3mo)	Travel rewards, 3x on shipping, internet, advertising, travel	ADD THIRD — points ecosystem
Ink Business Premier®	$195	$1,000 (spend $10K/3mo)	Large purchases ($5K+), 2.5% on $5K+ purchases, 2% all other	FOR SCALING — large vendor payments
Sapphire Reserve for Business℠	$550	150,000 points (spend $20K/3mo)	Premium travel, 10x on hotels via Chase Travel, $300 travel credit	ASPIRATIONAL — enterprise phase

Recommended Sequence

6. **Week 2:** Apply for Ink Business Cash® ($0 annual fee, $750 bonus)
7. **Month 3:** Add Ink Business Unlimited® ($0 annual fee, $750 bonus)
8. **Month 6+:** Evaluate Ink Business Preferred® ($95, 100K points)

TOTAL POTENTIAL WELCOME BONUSES

$2,500+ in the first 6 months — achievable through normal business spending across the Ink Business Cash and Ink Business Unlimited cards alone.

Section 7: Income, Business Fees & Requirements

What Chase/JPMorgan Requires to Open Business Accounts

- **Valid EIN** (Employer Identification Number) or SSN for sole proprietor
- **Business formation documents** — LLC Articles of Organization, Certificate of Good Standing
- **Government-issued photo ID**
- **Business address verification**
- **Estimated annual revenue** and business description
- **Note:** Some accounts may require an in-branch visit

Fee Schedule — Key Business Banking Fees

Fee Type	Amount	Notes
Domestic Outgoing Wire	$25–$35	Per transaction
Incoming Domestic Wire	$0–$15	Varies by account tier
International Outgoing Wire	$40–$50	Per transaction
International Incoming Wire	$15–$20	Per transaction
Excess Cash Deposits	Varies	Free threshold depends on account tier ($5K–$25K)
Overdraft Fee	$34 per item	Can opt out of overdraft services
ACH Credit	$0.15–$0.25/item	Volume-negotiable
ACH Debit	$0.20–$0.35/item	Volume-negotiable
Stop Payment	$30	Per request
Cashier's Check	$8	Per check

Section 8: 4 Deal Type Options

The following four deal structures are presented to JPMorgan Chase as options for the commercial relationship. Each is evaluated for IP risk, revenue potential, and strategic alignment.

Option A: Upfront Cash — Community Partner Deal Type ⭐

Element	Detail
Structure	Lump-sum advance payment + reduced ongoing royalties
IP Risk	**ZERO** — no algorithm sharing, no IP

Element	Detail
	transfer
Payment	Quarterly milestone payments tied to pilot KPIs

Community Alignment: Ties directly into JPMorgan Chase's **$30 Billion Racial Equity Commitment** announced October 2020 — supporting Black-owned businesses, expanding access to technology, and growing diverse suppliers. JPMorgan has already deployed $13B+ of the $30B commitment and reached its $750M diverse supplier spending goal two years ahead of schedule.

CRA Alignment: JPMorgan Chase Bank, N.A. holds an **Outstanding CRA rating** from OCC (evaluation period 2020–2023) — community partner deals strengthen this rating.

BIM-APES Qualifies As: Black-owned technology company, NYC-based, financial services innovation, athlete financial literacy alignment.

IDEAL NARRATIVE

"JPMorgan Chase invests in Black-owned fintech innovation to bring NIL financial intelligence to underserved athlete communities."

Option B: Salary/Retainer Deal Type (1099 Independent Contractor)

Element	Detail
Structure	Fixed monthly retainer as independent contractor
IP Risk	**LOW** — but ONLY if pre-existing IP clause is airtight
Payment	Monthly retainer ($15,000–$35,000/mo depending on scope) + license revenue in parallel

Element	Detail
Tax Implications	Self-employment tax (15.3%), quarterly estimated payments required

Critical Clause: *"All intellectual property created by Licensor prior to and during the engagement remains the sole property of Licensor. No work-for-hire doctrine applies. No assignment of pre-existing IP."*

W-2 vs. 1099 ANALYSIS

W-2: DANGER — Work-for-hire doctrine may apply; JPMorgan could claim IP ownership of work product created during employment. **DO NOT USE** unless IP assignment exclusion is ironclad.

1099: PREFERRED — Independent contractor status preserves IP ownership more cleanly, but requires pre-existing IP clause.

Option C: Stand-Alone License Agreement ⭐⭐ RECOMMENDED

Element	Detail
Structure	Pure software license — annual fee + API usage + seat-based pricing
IP Risk	**ZERO** — cleanest IP structure, no employment relationship, no work-for-hire ambiguity
Payment	Annual license fee paid in advance + usage-based API fees billed monthly in arrears
Model	This is the FICO model: JPMorgan pays for outputs, never sees the algorithm

Includes: SLA (99.9% uptime, 4-hour response), derivative classification protections, audit rights, termination fee (50% of remaining term value).

Best For: Long-term enterprise relationship with zero IP exposure.

Option D: Hybrid (Recommended Starting Position) 🏆

Element	Detail
Structure	Stand-Alone License + Community Partner Investment + Optional 1099 Retainer
IP Risk	**ZERO to LOW** — layered protections across all deal components
Revenue Streams	Three independent streams: license fees + community partner investment + optional retainer income

Maximum Narrative: *"JPMorgan Chase licenses BIM-APES NIL intelligence while investing in Black-owned fintech innovation through its $30B Racial Equity Commitment."*

This creates **three independent revenue streams**, each with its own IP protection layer.

RECOMMENDED ESCALATION PATH

1. **Start** with Option C (Stand-Alone License) — zero IP risk, clean commercial structure
2. **Layer in** Option A (Community Partner) for additional capital and narrative alignment
3. **Add** Option B (1099) only if JPMorgan requests dedicated on-site consulting — ensure pre-existing IP clause is ironclad

---

Section 9: Stand-Alone License Agreement — 20 Required Clauses

The following 20 clauses are required in any stand-alone license agreement between BIM-APES Software and JPMorgan Chase & Co. / JP Morgan Wealth Management. Each clause protects IP ownership, ensures commercial clarity, and aligns with industry-standard enterprise licensing practices.

#	Clause	Description
1	**Grant of License**	Non-exclusive, non-transferable license to use BIM-APES Software outputs and API access for the licensed term.
2	**Scope of Use**	Advisory/informational purposes only; expressly not for credit decisioning, lending, or capital adequacy determinations.
3	**License Term**	90-day free pilot → 3-year initial term → 2-year renewal option (5 years total maximum initial engagement).
4	**License Fees**	Annual license fee + per-call API charges + seat-based dashboard fees, as specified in the pricing schedule.
5	**Payment Terms**	Annual in advance for enterprise term; net-30 for usage overages billed monthly in arrears.
6	**IP Ownership**	All intellectual property remains the sole property of Dashawn R. Bledsoe / BIM-APES Software in perpetuity.
7	**No IP Transfer**	No assignment, sale, or transfer of any IP rights

#	Clause	Description
		under any circumstances. License is use-only.
8	**No Patent Sale**	Licensor has elected defensive publication; no patent rights exist to transfer, and none shall be created for transfer.
9	**Trade Secret Protection**	Licensee acknowledges that all algorithms, weights, coefficients, and training data are trade secrets under the Defend Trade Secrets Act of 2016.
10	**Derivative Classification**	All outputs generated by BIM-APES Software are classified as derivatives of the underlying trade secrets; no reverse engineering permitted.
11	**Non-Reverse Engineering**	Licensee shall not attempt to reverse engineer, decompile, or disassemble any BIM-APES algorithms, models, or scoring systems.
12	**Non-Compete**	Licensee shall not develop competing NIL valuation systems using knowledge gained from this agreement during the term and for 24 months thereafter.
13	**Confidentiality / NDA**	Mutual NDA covering all proprietary information exchanged during the engagement, surviving termination by 5 years.
14	**Data Security**	SOC 2 Type II compliance, NIST CSF alignment, encryption at rest (AES-256) and in transit (TLS 1.2+).
15	**Service Level**	99.9% uptime guarantee,

#	Clause	Description
	Agreement	4-hour critical incident response, 24-hour standard response. SLA credits for breach.
16	**Audit Rights**	Licensor retains right to audit Licensee's use of outputs for compliance with derivative classification and scope-of-use restrictions.
17	**Limitation of Liability**	Standard limitation; total aggregate liability capped at 12 months of license fees paid or payable.
18	**Termination**	Either party may terminate with 90-day written notice; early termination fee = 50% of remaining term value.
19	**IP Reaffirmation at Renewal**	IP ownership by Dashawn R. Bledsoe is formally reaffirmed in writing at every renewal cycle as a condition of renewal.
20	**Governing Law**	State of New York; disputes resolved by binding arbitration in New York County under AAA Commercial Arbitration Rules.

Section 10: JPMorgan Chase Vendor Onboarding Checklist

JPMorgan Chase has one of the most rigorous vendor onboarding programs in banking. This checklist covers all requirements based on JPMorgan's published Minimum Control Requirements and TruSight assessment framework.

#	Requirement	Status	Priority	Notes
1	**Master Services Agreement (MSA)**	☐ Pending	**Critical**	JPMorgan template + BIM-APES IP addendum
2	**Mutual Non-Disclosure Agreement (NDA)**	☐ Pending	**Critical**	Must cover trade secrets and derivative classification
3	**SOC 2 Type I Report**	☐ Pending	**Critical**	Required for any vendor handling data — begin immediately
4	**SOC 2 Type II Report**	☐ Pending	High	Required within 12 months of engagement
5	**TruSight Assessment**	☐ Pending	High	Co-founded by JPMorgan — proactive submission recommended
6	**NIST Cybersecurity Framework Alignment**	☐ Pending	High	Required per JPMorgan Minimum Control Requirements
7	**COBIT Framework Documentation**	☐ Pending	Medium	Secondary framework required by JPMorgan
8	**Information Security Program Documentation**	☐ Pending	**Critical**	Must be documented, reviewed, implemented per NIST/COBIT
9	**Risk Management Program**	☐ Pending	High	Documented program to evaluate, mitigate, monitor risks
10	**Commercial**	☐ Pending	**Critical**	Standard

#	Requirement	Status	Priority	Notes
	General Liability Insurance ($2M min)			vendor insurance requirement
11	**Cyber Liability / E&O Insurance ($5M min)**	☐ Pending	**Critical**	Required for technology vendors handling financial data
12	**W-9 / Tax Documentation**	☐ Pending	**Critical**	Required for all US-based vendors
13	**Business Registration / Certificate of Good Standing**	☐ Pending	**Critical**	NY State filing
14	**EIN Verification**	☐ Pending	**Critical**	IRS-issued
15	**Defensive Publication Proof of Filing**	☐ Pending	High	IP.com receipt with timestamp
16	**Methodology White Paper**	☐ Pending	High	Broad approach only — NO weights, coefficients, or training data
17	**Subcontractor Risk Assessment**	☐ Pending	Medium	JPMorgan requires MCRs extend to all subcontractors
18	**Annual Control Assessment Commitment**	☐ Pending	Medium	JPMorgan requires annual verification of controls effectiveness

---

Section 11: Sole IP Owner Attestation

ATTESTATION OF SOLE INTELLECTUAL PROPERTY OWNERSHIP

I, **Dashawn R. Bledsoe**, hereby attest that:

1. I am the sole owner of all intellectual property comprising the BIM-APES Software platform, including but not limited to: all algorithms, valuation methodologies, scoring models, data architectures, derivative classification systems, brand equity metrics, and associated trade secrets.

2. No individual, corporation, institution, or entity holds any ownership interest, license right, or claim to the BIM-APES intellectual property except as explicitly granted through executed license agreements.

3. The intellectual property strategy of BIM-APES Software is based on defensive publication and trade secret protection. No patents have been filed or granted. This is by design — defensive publication establishes prior art under 35 U.S.C. § 102, blocking competitor patent claims, while trade secret protection under the Defend Trade Secrets Act of 2016 (18 USC §1836) provides indefinite federal enforcement.

4. All license agreements, including the proposed agreement with JPMorgan Chase & Co. / JP Morgan Wealth Management, are non-exclusive and do not transfer any IP ownership rights.

5. This attestation shall be reaffirmed at every renewal cycle of any license agreement.

Sole IP Owner: Dashawn Ramel Bledsoe **Entity:** BIM-APES Software by NIBLS

Date: **Signature:**

Prepared April 14, 2026 | All intellectual property rights reserved.

This document does not constitute a binding agreement. It is a strategic framework for deal structuring and negotiation purposes only.
